INTRODUCTORY

In presenting this, my Annual Catalogue, to you, I beg to say I have spent twenty-three years making the breeding and exhibiting of thoroughbred Poultry, Pigeons, Pheasants, Pea Fowls, etc., my special study and aim, and have built up the largest and best flocks in variety and quality of this nature in America to-day. I claim to be one of the few who have made this their only business, and made a success of it in a commercial and financial way, as well as in variety and quality, and this alone proves my ability to please my customers and make them once a customer always a customer, for it is my aim to please every one who favors me with their order, as I plan to make my customers of the past and present my future customers. Should you desire anything in this line at any time I will be pleased to hear from you and quote you prices, and will add I guarantee to please.

Any specimen I send out that is not as I represent it to be can be returned to me and I will refund the purchase price, less charges, to you.

My Show Record

It would be impossible for me to figure out how many prizes I have won altogether, and so I will take up 1910 alone. In 1910 I won on my exhibits at such shows as New York, Boston, Mass., Hagerstown, Md., Cortland, N. Y., Cambridge, N. Y., York, Pa., Columbus, S. C., Augusta and Atlanta, Ga., Montgomery and Selma, Ala., Nashville, Tenn., Dallas and San Antonio, Tex., etc., etc., a total of thirty-nine shows, having as many as 1800 specimens at one time in four different shows. I won over 10,000 first and second prizes in 1910 alone, and scattered over the entire east, south and south west, meeting the best specimens of the various localities. This alone gives you an idea as to the quality of my stock and the vastness of my business.

My Importation Facilities

I am in touch with the best breeders and shippers on the other side, and can import any of the rare and ornamental varieties for you cheaper than you can possibly do it yourself, and as cheap as any dealer can. I guarantee every specimen to arrive in good health and condition.

Eggs for Hatching.

I do not sell eggs from all varieties, but do from many varieties, and guarantee all eggs fresh laid, true to variety, from same birds and pens that I breed from, and equal to those I set myself in each variety.

Incubator Eggs for Broilers, Egg Producers and General Utility Purposes.

From flocks with free farm range, same blood as my best, but not so closely culled, but many birds will come from these as good as the best, and all will be good, healthy, vigorous chicks of the best blood and sure to please. For prices for eggs see illustrated pages of the various breeds.
